Subject: Talking points for Guy

- In our October 2017 final rule, we finalized a final rule partially approving the 2009 Texas Regional Haze State Implementation Plan (SIP) submission and promulgated a Federal Implementation Plan (FIP) for Texas to address Best Available Retrofit Technology requirements for EGUs
- This includes an intrastate trading program capping emissions of SO₂ from certain EGUs in Texas
- We believe certain aspects of the federal plan can benefit from further public comment.
- Our August 2018 proposed rule proposes to reaffirm our October 2017 rulemaking and opened a public comment period that ends on Oct. 26.
- We will consider the public hearing record and all other comments received during our decision-making process.
